

# AI Career Platform - Phase 1 MVP Architecture

## Phase 1 Architecture

React Frontend → Spring Boot Backend → PostgreSQL → AWS S3 → FastAPI AI Service

Spring Boot Modules:

- Authentication Module
- User Module
- Resume Module
- Job Module
- News Module
- Goal Module

FastAPI AI Modules:

- Resume Analyzer
- Career Coach
- Content Generator

## Frontend Features

Authentication:

- Register
- Login
- Forgot Password
- Google OAuth

User Dashboard:

- Profile
- Skills
- Education
- Experience
- Projects

Resume:

- Upload Resume
- View ATS Score
- Suggestions

Jobs:

- View Jobs
- Apply Job
- Save Job
- Search Job

News:

- Read News
- Like
- Bookmark
- Comment

Goals:

- Create Goal

- Track Progress
- Milestones

## Backend Structure

career-platform-backend

Modules:

- auth
- user
- resume
- jobs
- news
- goals
- common
- config
- security
- exception

## Database Tables

users  
resumes  
jobs  
applications  
news  
goals

## Technology Stack

Frontend:

React, TypeScript, Redux Toolkit, Tailwind CSS, Axios

Backend:

Java 21, Spring Boot 3, Spring Security, JPA, PostgreSQL, JWT

AI:

FastAPI, LangGraph, OpenAI/Gemini

Storage:

AWS S3

Deployment:

Docker, EC2, GitHub Actions

## Development Roadmap

Week 1:

Project Setup, Authentication, JWT, Roles

Week 2:

User Profile, Education, Experience, Projects

Week 3:

Resume Upload, S3 Integration

Week 4:

FastAPI Resume Analyzer, ATS Score

Week 5:

Job Module

Week 6:

News Module

Week 7:

Goal Tracking, Career Coach AI

Week 8:

Docker, AWS Deployment, CI/CD

## **Expected Outcome**

- Full Stack Application
- JWT Authentication
- Resume Upload
- ATS Analyzer
- AI Career Coach
- News Portal
- Job Portal
- Goal Tracker
- AWS Deployment
- Dockerized Application
